- 7) **Home Button:** Home hotkey of smart phone.
- 8) **Return Button:** Return hotkey of smart phone.

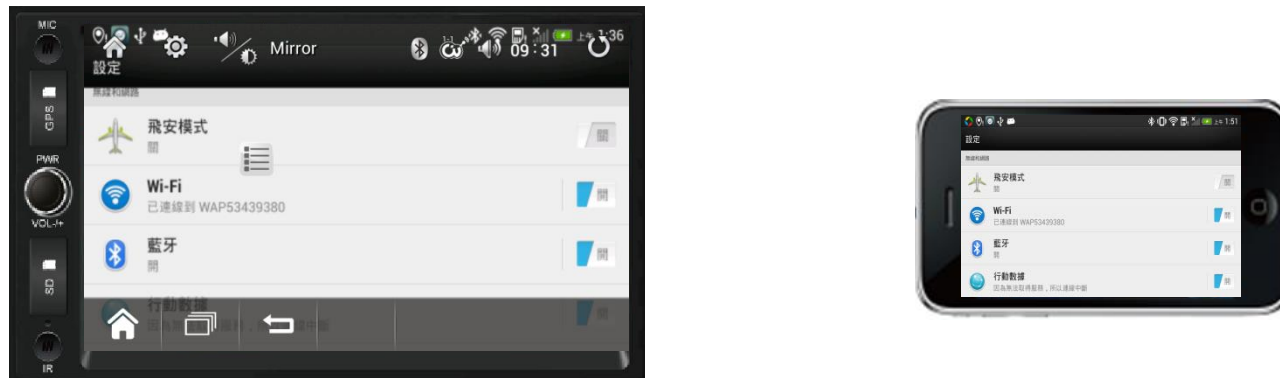

Reminder:

- **It's only can display static screen in A-Mirror (e.g., Gallery, Contacts, Brower, etc.)**
- **Every smart phone has own display resolution so not all smart phone can mirror success.**
- **A-Mirror also support horizontal screen if smart phone has turn on its screen rotation.**

- **Air Media linked 3 smart phone at a same time**

- **A-Mirror in horizontal screen**

Trouble Shooting

Q: Can't not entry navigation interface.

A: Make sure the Navi King navigation's map data has correct.

Q: Smart phone can't install Air Media automatically through USB cable.

A1: Use original factory equipped USB cable.

A2: Make sure USB debugging is open if not, please go to Google Play Store searching "Airmedia" or "Autonet"

Q: When the Bluetooth paired success, sometimes will be mentioned connect failed

A1: Some cellphones with Android system may occur this problem at the first connection. Please just find

the paired device in matching list and then connect them once more.

A2: The unsuccessful connection is compatibility issues between cell phone and Bluetooth. If this occurs, please check the options in pair list of your cell phone. And you will find that the setting of Bluetooth Media and smart Media has been turned off. Turn on them and the connection will be successful.

Q: Radio can't research channels

A: to check the radio antenna whether connected and have signal before use it.

Q: Play music/video or Navigation no voice

A: System is mutes or not, then check the default volume.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

CAUTION:

To assure continued FCC compliance:

1. Any changes or modifications not expressly approved by the grantee of this device could void the user's authority to operate the equipment.
2. This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
